Summary

Seasoned professional with extensive technical knowledge and a strong drive to continuously learn and implement new technologies.

His ability to adapt easily to different challenges showcases his versatility as a professional, enabling him to consistently generate fresh ideas and innovative solutions that add significant value to the projects he contributes to.

With a focus on project management and leadership, he has spent over a year honing his skills in these areas, aiming to foster the growth of his teams both in technical expertise and soft skills.

Passionate about excellence, he is always seeking opportunities for professional and personal development, cultivating an environment that supports the advancement and well-being of his colleagues.

Experience

Team Leader
Arbusta
Sep 2021 - May 2023 (1 year 8 months)

In this stage, I have dedicated myself to managing different development teams focused on the Internal Management System of clients:
• Leader of outsourced team for **SWISS Medical Argentina (2021-2023)**
• Leader of outsourced team for **MAPFRE Uruguay (2022-2023)**

Technologies implemented:
• SQL Server
• PL/SQL
• Mongo DB/Firebase
• Java/JSP
• Javascript/Node.js
• React/Tailwinds/BackboneJs

Ssr Tech Analyst | Developer
Arbusta
Sep 2020 - Sep 2021 (1 year)

During this period, I worked entirely on Web Development projects:
• WordPress Landing Development - **SimpleComercio (2021)**
• Internal Development of Project Calculator (Commercial/Finance) - **Arbusta (2021)**
• Internal Development of Recruiting Tool (HR) - **Arbusta (2021)**
• Development of Signature Generator - **SimpleComercio (2021)**
• E-Commerce Development "Arbusta Talent Market" for entrepreneurs - **Arbusta (2021)**

Technologies implemented:
• JavaScript
• Wordpress
• PHP & SQL
• Python in Airflow
• Amazon Web Services (LightSail, Redshift, S3)
• Firebase (Auth, Realtime Database, Storage, Cloud Functions, Analytics)
• Google AppScript
• REST APIs/MicroServices
• Design with Adobe (Illustrator, Adobe XD, Photoshop)
• Digital Ocean
• Docker

Jr Analyst
Arbusta
Jul 2019 - Sep 2020 (1 year 2 months)

The first few months were dedicated to Data Analysis projects:
• Fraud Prevention - MercadoLibre (2019)
• Brand Protection Program (BPP) - MercadoLibre (2019)

The next step was Automated Data Analysis:
• Automated Data Analysis and Normalization with JavaScript - **MiDinero (2019)**
• Automated Data Analysis and Normalization with JavaScript - **Reaching U (2020)**
• Automated Document Uploading to Salesforce with JavaScript - **Reaching U (2020)**
• Report Automation with AWS Redshift and Airflow (Python) - **IUNIGO (2020)**

Starting from 2020, I focused on Web Development and Maintenance:
• Migration of WordPress sites to AWS servers and DNS management - **Njambre (2020)**
• Web questionnaire development for entrepreneurship - **Njambre (2020)**

Technologies implemented:
• Javascript/Google AppScript
• Big Data/Data Automation
• AWS/LightSail Servers
• AWS Redshift SQL Database
• AWS Dynamo NOSQL Database
• PHP/WordPress
• Python/Apache Airflow
• FTP/Xampp
• Node JS
